AMENDMENT

OFFICIAL

Applicant: Lowell Glen Bradford
Serial Number: 10/602,669
Filing Date: 06/25/2003
Title: CHERRY TREE named 'GLENROCK'

Examiner: Anne Marie Grunberg
Group Art Unit: 1661

April 26, 2004

Commissioner of Patents and Trademarks
Washington, D. C. 20231

Dear Sir:

In response to the Office Action dated April 8, 2004, please
amend the above-identified Plant Patent Application as follows:

RESPONSE TO OBJECTIONS

In Response to Objection A: To include a comparison between the only
known parent and the present invention, please insert the following
paragraph after Line 4 on Page 2 and before Line 5 on Page 2:

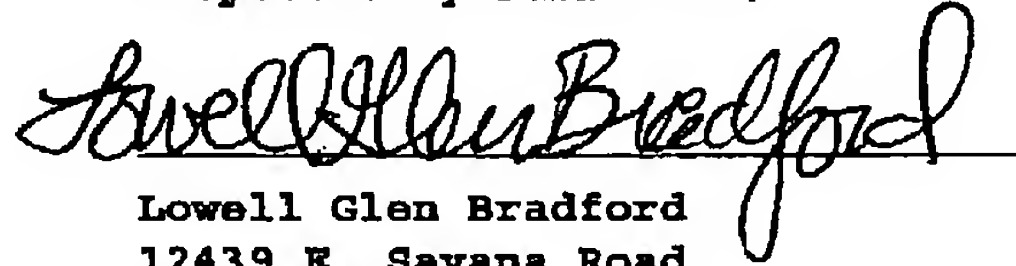

The present variety is similar to its seed parent, the 'Tulare'
(United States Plant Patent Number 6,407) cherry, by producing cherries
that mature in the early season and are mostly dark red in skin color,
sweet with moderate acid in flavor, firm in texture, and very crack
resistant, but is distinguished therefrom by blooming about two days
earlier, by producing cherries that ripen about three days later and are
more oblate in shape instead of oblong, and by being a pollinator for
both the 'Glenred' and 'Tulare' cherries. On the contrary, the 'Tulare'
does not pollinate the 'Glenred' nor itself.

END OF RESPONSE

In view of the above referenced response to the objection, the applicant proposes that the application is now in proper condition for allowance. Reconsideration of this application, with this amendment is respectfully requested.

The applicant authorize Ms. Anne Marie Grunberg, the examiner, to telephone by collect call (209-389-4212) if there is anything further deficient in this application.

Respectfully submitted,

Lowell Glen Bradford
